

VoiceCom is our primary communication tool within the Shaw National Area. What makes it so unique?

Your mailbox is connected through thousands of other mailboxes. Your 'A' key capability is what makes it so unique.

Always call yourself first and get 'inside the VoiceCom network'. Now you can connect to all the other mailboxes.

Do not call someone else's VoiceCom number directly without getting inside your mailbox first. When you do that, the receiver cannot 'A' key you back.

Don't be left outside the loop. You want to know what everyone else knows...plus your help response time from your director is much faster.

To the Shaw National Area and those who choose to work with us

Ten years ago my friend Linda Toupin introduced me to VoiceCom. She Writes:

"The true value of VoiceCom is what I call the 'crease in the piece of paper'. Your thoughts about yourself, the world, success, failure etc. are nothing more than creases in the brain. After hearing something over and over you accept it as fact. I have said many times the difference between someone who makes \$40,000 a month and \$40,000 a year is not how hard they work but how they think."

VoiceCom allows you to eavesdrop in on conversations that Nationals and Top directors have with their consultants and offspring. The messages are meant for their people to hear. Through the magic of VoiceCom, you can eavesdrop into that conversation and training. You will begin to think like these women think.

VoiceCom on a daily basis (5-10 minutes per day) will change the way you think. This will be reflected in the things you say and do, resulting in more positive results from your MK business.

This is my primary communication tool and is used by all the Shaw Area Directors and future leaders.
